ABOUT THIS REPORT

This report was produced using live on the market sales listing data.

We have maximised accuracy by only publishing those results with high enough data sample sizes.

This data is calculated at a dwelling type and bedroom level, which means it will vary from commonly published house and unit median sale prices that include all bedrooms as consolidated median results.

For entry-level homebuyers and investors, this illustrates low price point suburbs.

You should always conduct additional due diligence on any property and the suburb it is located in to ensure it meets your investment criteria.
