ABOUT THIS REPORT

This report was produced using live on the market rental and sales listing data.

We have maximised accuracy by only publishing those suburb results with high enough data sample sizes.

This data is also calculated at both a dwelling type and bedroom number level.

This increases its relevance for investors, but it also means it will vary from commonly published house and unit median yields that include all bedrooms as consolidated median yield results.

This report is designed to illustrate potential opportunities, but

You should always conduct additional due diligence to verify the sustainable rental income on any specific property and take into account factors such as vacancy rates and changes in rental income seasonally.

You should always conduct additional due diligence on any property and the suburb it is located in to ensure it meets your investment criteria.

Indicator	Legend
	No Change in Rank from previous month
	Rank has moved up in list from previous month
	Rank has moved down in list from previous month
	Rank has moved up sufficiently to be included in this top x list from previous month
	This item had no rank last month: e.g. <ul style="list-style-type: none"> - there were insufficient listings last month to record a valid statistic - the list item is new
