Biggest Median 5 Year Price Decline Suburbs

ABOUT THIS REPORT

This report was produced using live on the market sales and rental listing data.

We have maximised accuracy by only publishing those suburb results with high enough data sample sizes.

This data is also calculated at both a dwelling type and bedroom number level.

This increases its relevance for investors, but it also means it will vary from commonly published house and unit median sale prices that include all bedrooms as consolidated median results.

This report is designed to identify the suburbs where median prices have declined the greatest in the last 4 years. Any median change should not be construed to mean that each house or unit in the suburb has decreased in value by this percentage.

You should always conduct additional due diligence on any property and the suburb it is located in to ensure it meets your investment criteria.

Indicator	Legend
	No Change in Rank from previous month
	Rank has moved up in list from previous month
	Rank has moved down in list from previous month
	Rank has moved up sufficiently to be included in this top x list from previous month
	This item had no rank last month: e.g. - there were insufficient listings last month to record a valid statistic - the list item is new
